## DENSOLEN®-Tapes on Different Factory Coatings

Dear Mr. Estrada,

For one century now, DENSO Group Germany has been representing experience, quality and reliability in corrosion prevention and sealing technology. The international leading corporation's success is based on the development of the "DENSO-Tape," which was patented in 1927 as the world's first product for the passive corrosion prevention of pipelines. Ever since, the DENSO Group Germany has been establishing and guaranteeing the highest quality standards with technologically trend-setting products.

We can confirm that our three-layer, self-amalgamating DENSOLEN® tapes so as -AS39P, -AS50, -AS30 and others, can be applied on different types of factory coating, so as PUR, FBE, PE, PP and CTE. Furthermore, our tapes are compatible with the before mentioned factory coatings, so as stated in our product data sheets. Cleaning the surface according to the application recommendation and applying first our DENSOLEN®-HT/-HT25 Primer, the achieved adhesion fulfills the common standards.

Please refer to [denso-group.com](http://denso-group.com) for the latest version of our product information.

If you need any further assistance, please feel free to contact us.

Yours sincerely,

Thomas Kaiser  
Managing Director
